

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) An organic electroluminescent element comprising a pair of electrodes having therebetween at least one constituting layer containing a phosphorescent light emitting layer, wherein one of the constituting layers contains a compound represented by Formula (15):

Formula (15)

wherein  $R_1$  and  $R_2$  each independently represents a hydrogen atom or **[[said]]** a substituent;  $n$  and  $m$  each represents an integer of 1 to 2;  $k$  and  $l$  each represents an

integer of 3 to 4, provided that  $n + k = 5$  and  $l + m = 5$ ; and  $Z_1$ ,  $Z_2$ ,  $Z_3$  and  $Z_4$  each represent a 6-membered aromatic heterocyclic ring containing a nitrogen atom; and wherein said substituent is selected from the group consisting of an alkyl group, a cycloalkyl group, an alkenyl group, an alkynyl group, an aryl group, an aromatic heterocyclic group, a heterocyclic group, an alkoxy group, a cycloalkoxyl group, aryloxy group, alkylthio group, cycloalkylthio group, an arylthio group, an alkoxycarbonyl group, an aryloxycarbonyl group, a sulfamoyl group, an acyl group, an acyloxy group, an amido group, a carbamoyl group, an ureido group, a sulfinyl group, an alkylsulfonyl group, an aryl sulfonyl group, an amino group, a halogen atom, a fluoride hydro fluoro carbon group, a cyano group, a nitro group, a hydroxyl group, a mercapto group and a silyl group.

**2-4. (Cancelled)**

**5. (Previously presented)** The organic electroluminescent element of claim 1, wherein the compound represented by Formula (1) has a molecular weight of 450 or more.

**6-31. (Cancelled)**

**32. (Previously presented)** The organic electroluminescent element of claim 1, wherein the light emitting layer contains the compound represented by Formula 15.

**33. (Previously presented)** The organic electroluminescent element of claim 1, wherein at least one of the constituting layers is a hole blocking layer and the hole blocking layer contains the compound represented by Formula 15.

**34. (Previously presented)** The organic electroluminescent element of claim 1 which emits blue light.

**35. (Previously presented)** The organic electroluminescent element of claim 1 which emits white light.

**36. (Previously presented)** A display device having the organic electroluminescent element of claim 1.

**Claims 37-63 (Canceled).**

**37. (Previously presented)** The organic electroluminescent element of claim 1, wherein the constituting layer containing the compound represented by Formula (15) is an electron transporting layer.
